DETAILED ACTION***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsujio (us patent 6,458,192).

Tsujio teaches an ink composition comprising a colorant, a film-forming resin and a release agent (abstract). The reference further teaches that a water-soluble polymer of formula below may be present in the composition:

in the formula, M represents an alkali metal selected from sodium, potassium and lithium and n is 1,000 to 3,000. The formula above is commercially available product (col. 3 lines 27-col. 4 line 11) wherein the polymer is present in the amount of 0.05 to 2

percent by weight. The reference fails to teach the specific binder set forth in claim 1 by Applicant. Therefore it would have been obvious to one of ordinary skill in the art at the time of invention to substitute the claimed commercially available water-soluble polymer Kelcoreet 200 (page 6 line 7 of Applicant specification) for that disclosed by Tsujio motivated by the fact that such polymer (saccharide) materials are known for use in composition such as that disclosed by Toshimitsu JP 04-214782.
